

Activity 8-1 – React routing/ communication with components

1. Try the following code:

```
import React from 'react';
import { Link } from 'react-router';
export default function PostButton(props) {
  return (
    <Link to={`posts/${props.postId}`}>
      <div className="post-button" >
        {props.title}
        <span>{props.tags}</span>
      </div>
    </Link>
  );
}
```
